

Operating Profit up 88% on Q2-2003 to US\$1,164,960

Highlights for the Third Quarter to November 30, 2003

- Net Earnings after tax for the third quarter were US\$1,017,089 up from earnings of US\$47,921 in the previous corresponding quarter.
- Amerigo acquired the Chilean MVC copper project on July 3, 2003. As Amerigo has a February year-end, the third quarter is the period September 1 to November 30, 2003. Accordingly this report includes the first full quarter of Operating results from MVC
- Amerigo produced and sold 7.13 million pounds of Copper in the quarter, for a cash cost before El Teniente royalty of 57.5c per pound, and a total cost after royalty and depreciation of 63.9c per pound.
- The average copper price received during the quarter was 86.6c per pound.
- Copper production for the quarter represents an annualized rate of approximately 13,000 tonnes, **up 18%** on production rates prior to Amerigo's acquisition.
- **Operating cashflow** from MVC for the quarter ended November 30 was **US\$1,331,429**, up 73% on Q2-2003.
- Earnings per share were US1.77c (2.30c Canadian) for the quarter and US4.20c (5.46c Canadian) for the year to date.
- US Dollar Reporting and Year-end Change due to the change in the Amerigo asset base, all financial reports are expressed in US dollars. Amerigo has received regulatory approval to change to a December 31 year-end effective December 31, 2003.
- Warrant Listing On December 18, 2003, certain warrants issued by Amerigo in June and July 2003 began trading on the TSX Venture Exchange under the symbol ARG.WT. Each warrant is exercisable into a common share of Amerigo until June 20, 2005 at an exercise price of CDN\$0.70.

- Production expansion plans remain on track with the installation and commissioning of the additional classification and flotation equipment in the first quarter of 2004 and a budgeted production rate for 2004 of 16,000 tonnes of refined copper.
- Further production increases Planning is well underway for Stage 2 of the expansion which will increase copper production further in 2005 to an annual level of approximately 20,000 tonnes. Preliminary indications are that this stage will also require less investment than originally budgeted. Both stages of expansion position Amerigo well to take advantage of current higher prices due to strong demand from China and improving economies in other parts of Asia, the US, and Europe.

This Stage 2 production increase will be generated from the higher rate of extraction from the Colihues tailings project from the present 2000 tonnes of plant feed per day trial operation to a fully commercial rate of 10,000 tonnes per day. Further studies are planned for 2004 to examine the potential to increase production from Colihues beyond this rate.

- New business Amerigo is in discussions with several parties regarding
 acquisition opportunities in both sulphide and oxide copper projects within
 Chile. Chile is the world's largest copper producer, and for several years this
 region has been short of capital to develop projects which typically are not
 large enough to capture the attention of the world's major copper producers.
 Amerigo believes it can participate in such opportunities provided they offer
 similar potential for rates of return to the Company's MVC acquisition.
- Disposition of Canadian Exploration Properties Amerigo has entered into an agreement to sell its Canadian exploration properties to Nikos Explorations Ltd. (NIK-TSX-V) for 5,000,000 shares of Nikos, and the requirement to issue an additional 5,000,000 shares to Amerigo if Nikos holds any interest in the properties after June 2005. The transaction is subject to stock exchange approval. The sale will enable Amerigo to focus on its Chilean copper production at Minera Valle Central, while maintaining an interest in the upside in the Coppercorp, Island Copper and Bellevue properties.

Amerigo Resources Ltd.

Notes to Consolidated Financial Statements **November 30, 2003**

1 Acquisition of Minera Valle Central S.A.

On July 3, 2003, the company executed an agreement to acquire all of the issued and outstanding shares of Minera Valle Central S.A. (MVC). MVC is a Chilean copper producer and has a contract with Chile's state owned copper producer Corporacion Nacional del Cobre de Chile (Codelco) through 2021 to process the tailings from the El Teniente mine in Chile.

Consideration for this acquisition was \$1,854,589 and the assumption of loans of \$18,145,411 due to former shareholders, of which \$16,600,000 was repaid at the time of the acquisition. The remaining loan balance of \$1,545,411 together with the acquisition price, totalling \$3,400,000 will be paid in cash or shares of the company, in three years if the average copper price is over \$0.82 per pound. Payment in cash or shares of the Company (at a price based on the then current market price) is at the option of the company. However, if the company elects to pay in shares, the vendor has the right to either receive the payment in shares or receive payment in cash within two years counted from the end of the three-year period plus interest at an annual rate of 5%. If the copper price is below \$0.82 per pound, the payment period will be extended to five years. Payment will be made in cash only plus interest at an annual rate of 5%.

This acquisition has been accounted for using the purchase method and results of operations have been consolidated since the date of acquisition. The following table summarizes the purchase price allocation based on preliminary estimates of the fair values of the assets acquired and liabilities assumed; appraisals and valuations are being conducted and final allocation will be made upon completion.

2 Enami loan

MVC has entered into a series of agreements with the Chilean state owned company, Empresa Nacional de Mineria (Enami).

Under the terms of the agreements, Enami lent money to MVC for working capital purposes in 1998, 2001 and 2002. These loans accrue interest at an annual rate of prime as set by the Chilean Central Bank plus 2%. As at November 30, 2003, the interest rate was approximately 6%.

These loans are collateralized with assets of MVC with a value of approximately \$1,600,000.

The repayment of the principal and interest on these loans is based on production and copper prices, as follows:

- For the 1998 loan if the copper price is above \$0.82 per pound, the company is required to repay to Enami 100% of the excess price over \$0.82.
- For the 2001 and 2002 loans If the copper price is above \$0.75 per pound, the company is required to repay to Enami 50% of the excess price over \$0.75 and if the copper price is above \$0.82 per pound, the company is required to repay to Enami 100% of the excess price over \$0.82.

Based on prevailing copper prices during the period September 1 to November 30, 2003,, the 2001 loan was repaid in full in the quarter ended November 30, 2003. Other portions of the outstanding loans may be repaid within the upcoming year; however, as there is no minimum payment, the loans have been classified as non-current.

3 Other payables

Other payables include \$152,429 payable to related parties for a royalty dividend based on copper produced during the period from July 4, 2003 to November 30, 2003.
